Reviewer’s report

Title: Dopamine transporter 3'UTR VNTR genotype is a marker of performance on executive function tasks in children with ADHD

Version: 2 Date: 28 April 2008

Reviewer: Kate Langley

Reviewer’s report:

The authors appear to have addressed the points in my initial review. The manuscript continues to be clear and, despite the additional measures included in this version, is concise and of a suitable length.

I am pleased that the authors have taken my advice regarding the issues of multiple testing and sample description and believe that the manuscript is improved because of this.

I recognise their stand point not to include the FBAT analysis in this manuscript and also appreciate their decision not to combine the two manuscripts.

Overall I am happy with this manuscript and would recommend acceptance for publication.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
