Reviewer’s report

Title: The Sertindole Safety Survey: a retrospective analysis under a named patient-use program in Europe

Version: 3 Date: 21 May 2008

Reviewer: Jari Haukka

Reviewer’s report:

Minor Essential Revisions

There was two Tables numbered as "Table 1". Probably the last one (after "Table 6") should be numbered as "Table 7". In addition this last table was not cited in text.

Discretionary Revisions

In Table 6. there was 2 cases with carcinoma/tumor as non-fatatl serious adverse events. Just to be curious, on what basis these tumors were classified as serious adverse events connected to sertindole use.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:

I have received consultation fees in past five years from pharmaceutical companies that produce other antipsychotics than sertindole.
