Reviewer's report

Title: Putative psychosis genes in the prefrontal cortex: Combined analysis of gene expression microarrays

Version: 3 Date: 31 October 2008

Reviewer: Lesley Jones

Reviewer's report:

1. Is the question posed by the authors well defined?
   Yes

2. Are the methods appropriate and well described?
   Yes - the addition of an explanation of the correction factor for the non-independence of samples is an improvement

3. Are the data sound?
   Yes

4. Does the manuscript adhere to the relevant standards for reporting and data deposition?
   N/a

5. Are the discussion and conclusions well balanced and adequately supported by the data?
   Yes

6. Are limitations of the work clearly stated?
   Yes - the amended discussion is much improved and points out a number of limitations not previously mentioned in detail

7. Do the authors clearly acknowledge any work upon which they are building, both published and unpublished?
   Yes

8. Do the title and abstract accurately convey what has been found?
   Yes
