Reviewer's report

Title: Factors associated with dropout from treatment for Eating Disorders: a comprehensive review of literature.

Version: 2 Date: 1 September 2009

Reviewer: Michael Strober

Reviewer's report:

This is a revision of a ms that comprehensively reviews information bearing on a topic of considerable importance, the termination of treatment for eating disorders. The authors have responded exceptionally well to each of the points raised in a prior review. The present ms makes a valuable contribution and I have no recommendations for further revision.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
