Reviewer's report

Title: Antiretroviral treatment adherence among HIV patients in KwaZulu-Natal, South Africa

Version: 2 Date: 22 January 2010

Reviewer: Christian Laurent

Reviewer's report:

The revised article can be accepted without revision. I think there is a typo mistake: "All variables statistically significant at the P<.01 level in bivariate analyses were included in the multivariate model" (data analysis section): I suppose that variables were retained in multivariate analysis if p was <0.1??

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
