Reviewer’s report

Title: Understanding the Facilitators and Barriers of Antiretroviral Adherence in Peru: A Qualitative Study

Version: 2 Date: 13 September 2009

Reviewer: Lalit Dandona

Reviewer’s report:

The discussion that the authors have added on page 19 regarding the implications of their findings for intervention programs is quite generic. This should be more specific. A more explicit link of the main findings of this research to inform intervention programs in Peru should be attempted in the discussion.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
