Reviewer's report

**Title:** Perception of Epidemic Risk in the French General Population: A Cross-sectional study in the Rhone-Alpes Region

**Version:** 2  **Date:** 3 February 2010

**Reviewer:** Onno de Zwart

**Reviewer's report:**

The authors have made the requested changes to the manuscript. I think it is now suitable for publication.

There are two minor points

- Page 6. It is stated that the study was carried out soon after an epizooty of avian influenza. It is not clear what time period is meant by soon. This could be more specific.

- Questionnaire. It would be helpful to make the questionnaire online available either as linked to the article or on a site of the institute.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests.
