Reviewer's report

**Title:** Understanding long-term sick leave in female white-collar workers with burnout and stress-related diagnoses: a qualitative study

**Version:** 2  **Date:** 15 March 2010

**Reviewer:** Dag Bruusgaard

**Reviewer's report:**

The authors have responded adequately to the comments, except the question on possible attribution, which they did not understand(!).

Attribution in this setting means that the respondent have problems and in seeking an explanation puts the blame on the working place (They attribute the problem to bad working conditions - right or wrong).

Still I do not like table 2, but it might be acceptable with a much better lay out!
