Reviewer’s report

Title: Increasing uptake of colorectal cancer screening in Korea: a population-based study

Version: 1 Date: 17 March 2010

Reviewer: Jung-Jeung J Lee

Reviewer’s report:

*Major compulsory revisions
Authors concluded that "CRC screening increased after the introduction of the NCSP". Introduction of NCSP was at 2004, however, periods of analyzed data ranged from 2005 to 2008. There is no baseline information about CRC screening rates to compare before the NCSP with after the NCSP. Screening rates were certainly increased in this study, but it is not certain that this increases were due to "introduction" of NCSP. Above conclusion seems to be corrected or to be discussed more.

*Minor essential revisions
spelling mistakes in p5, 13: NSCP -- NCSP

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
