Reviewer's report

Title: Contrasting predictors of poor adherence to antiretroviral therapy in two South African treatment programmes: a cohort study

Version: 2 Date: 5 June 2010

Reviewer: Amita Gupta

Reviewer's report:

The authors have sufficiently addressed my comments and I feel no further edits with respect to the comments are needed. However, there seemed to be some formatting issues with the document sent particularly in the methods sections where they refer to Figure 1 and 2 legends. Also in the flow chart some of the text boxes cut off the text. This should be corrected before it gets placed online.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

I declare that I have no competing interests
