Reviewer's report

Title: Suicide without utilization of psychiatric services

Version: 1 Date: 20 April 2010

Reviewer: Maurizio Pompili

Reviewer's report:

The authors performed an investigation reporting results from a psychological autopsy study. They focused their research on Suicide without utilization of psychiatric services which is of interest for the journal. The statistical analysis is the strength of this paper. I have some doubts about references. I would add a few references such as

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
