Reviewer's report

Title: Vulnerability of eco-environmental health to climate change: The views of government stakeholders and other specialists in Queensland, Australia

Version: 1 Date: 1 February 2010

Reviewer: Francesco Forastiere

Reviewer's report:

The paper is well written and it covers an important public health issue. I am only concerned about the length of the paper and the narrative form of the transcripts from the focus groups. The authors should be able to summarize the main points also using a table with the main results. The discussion should follow the results of the study in a stricter way.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests
