Reviewer's report

Title: 'Let's Get Moving': Promoting Physical Activity in Primary Care

Version: 2 Date: 7 July 2010

Reviewer: Philip Van der Wees

Reviewer's report:

The authors provided an excellent response to my comments, although they could not provide some the information I requested (especially with respect to the patient’s health status, and the perceived barriers by the participating practitioners).

This limits the relevance of the study, but the authors addressed these limitations adequately in the methods and discussion sections.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
