Title: Prevalence of and Factors Associated with Dental Caries among Institutionalized Residents with Schizophrenia in Taiwan- A Cross-sectional Study

Version: 4 Date: 14 June 2010

Reviewer: Hannu Hausen

Reviewer's report:

You asked specifically about the authors' response to Dr Alexander Ponizovsky and Wai Kwong Tang. I feel that they have failed to address properly a number of pertinent points raised by Dr Ponizovsky. The criticism by Wai Kwong Tang was rather mild and did not address the major fundamental weaknesses of the study. The revised version of the manuscript is still far too lengthy, the expression is often incoherent, and quite a few ungrounded claims have been made. The comments presented in the re-review by Dr Tsakos are highly relevant.
