Reviewer's report

Title: Social determinants of rest deprivation amongst Ghanaian women: national and urban-rural comparisons with data from a cross-sectional nationally representative survey

Version: 3 Date: 18 May 2010

Reviewer: Elizabeth Klerman

Reviewer's report:

General
Manuscript is much improved in the consolidation of the two original reports and the better specification of the finding that rural-urban differences limit extrapolation of results from one setting to another.

Minor
• Some text editing would be useful. There are multiple awkward sentences.
• For clarity and ease of reading, please always refer to the Accra and then the North subsample – or vice versa. Do not sometimes discuss Accra subsample first and sometimes the North subsample first.
• The first paragraph of the Background is weak and missing some references.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
