Reviewer's report

Title: Are we doing enough? Evaluation of Polio Eradication Initiative in a district of Pakistan's Punjab province: a LQAS study

Version: 2 Date: 29 September 2009

Reviewer: Jeffrey Partridge

Reviewer's report:

Overall, the manuscript is more comprehensive and forthcoming with methodological details than the first version, and many suggested changes have been made.

Compulsory Revision

The manuscript now requires major editing for grammar and to make it more concise. For example, the Discussion section is full of re-statements of results. The Discussion needs to be tightened up to bring out the points/conclusions better. As is, it is too meandering and overloaded. Overall, even if the word count is within specification, the manuscript would be more engaging at, say, 1/3 less in length.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No, the manuscript does not need to be seen by a statistician.
