Reviewer's report

Title: An overview of ethical frameworks for programs to prevent overweight

Version: 1 Date: 9 March 2010

Reviewer: Rosely Sichieri

Reviewer's report:

This manuscript offers a very nice overview of ethical frameworks in public health, but lacks a real effort in evaluating ethical framework for prevention of obesity.

Except for the background that indicates interesting questions related to ethical issues in the prevention of obesity all other section present the frameworks in public health without linking them to obesity.

The scope and title should be revised or a more elaborated version including an effort to elaborate in each ethical framework how the obesity is similar or dissimilar from other public health issues should be presented.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
