Reviewer's report

Title: Prevalence of Lipid Abnormalities Before and After Introduction of Lipid Modifying Therapy among Swedish Patients with Dyslipidemia (PRIMULA)

Version: 1 Date: 10 July 2010

Reviewer: Emmanuel S. Ganotakis

Reviewer's report:

In general the paper is well-written and it represents a real world practice

I have no major comments except two minors:

1] It would be worth presenting cholesterol/triglycerides levels in both units, i.e. mmol/L and mg/dl.

2] Table 1: the numbers in brackets, I presume, that express the SD. If so please clarify.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
