Reviewer’s report

Title: Perceptions of frontline staff regarding data collection methodologies used during the 2009 A H1N1 influenza immunization campaign in Canada

Version: 3 Date: 18 November 2010

Reviewer: Patricia Blank

Reviewer’s report:

-is there any possibility to add some more results/data from this survey? For a full-text article I would expect some more ‘meat on the bone’.

-how many staff members have been asked to achieve the final sample size? you mentioned that 300 members have responded, but how many were asked to complete the questionnaire?

-Table 2: The sample size for the electronic method (nurses) is possibly not very meaningful.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
