Reviewer’s report

Title: The prevalence of hypertension, obesity and dyslipidaemia in minority individuals over 30-year-old from the pasture area of Xinjiang

Version: 1 Date: 17 November 2009

Reviewer: Benjamin Longo-Mbenza

Reviewer’s report:

I strongly recommend this outstanding paper for publication. Indeed the paper is well designed, conducted and interpreted.

Data are consistent with epidemic rates of hypertension observed in developing countries.
