Reviewer's report

Title: Sun Protection and Sunbathing Practices Among At-Risk Family Members of Patients with Melanoma

Version: 1 Date: 23 November 2010

Reviewer: Martha A Bass

Reviewer's report:

Minor Essential Revisions
1. This is a very well written manuscript. The content is well organized and understandable. The choice of statistical tests is well defined and appropriate. I have few suggestions for corrections to the manuscript:
   2. Page 4, Paragraph 2, line 6: close bracket ]
   3. On the final pages of the manuscript there are a few sentences that are very long and therefore slightly confusing. The reader may follow the message better if these could be divided into more than one sentence.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
