Reviewer’s report

Title: Evaluation of physical activity programmes for elderly people - a descriptive study using the EFQM'criteria

Version: 2 Date: 5 August 2010

Reviewer: Robert Newton

Reviewer’s report:

The abstract could be improved as there are instances where the english expression is unclear. The remainder of the manuscript is very well written.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
