Title: A(H1N1) pandemic influenza and its prevention by vaccination: Paediatricians opinions before and after the beginning of the vaccination campaign

Version: 1 Date: 21 October 2010

Reviewer: Holly Seale

Reviewer's report:

Discretionary Revisions
This paper describes the KAP of paediatricians regarding H1N1 and its prevention by vaccination. The results are very clearly presented and the paper is very nicely written. The only revisions I would suggest is to avoid using the word "few" when 50% of the cohort responds positively/negatively to something. Also, do we know rates of seasonal flu uptake amongst paediatricians in Canada?

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
