Reviewer's report

Title: Mothers' AdvocateS In the Community (MOSAIC) - non-professional mentor support to reduce intimate partner violence and depression in mothers: a cluster randomised trial in primary care

Version: 2 Date: 25 January 2011

Reviewer: Michele Kiely

Reviewer's report:

The manuscript is much improved. The comments I have are only minor.

Page 4, the first paragraph on Cluster and clinician recruitment and randomization:

The add sentence that begins “Training for both MCH nurses and GPs were based on adult learning…” should read “Training for both MCH nurses and GPs was based on adult learning…” (Training is the subject and is singular.)

The last word in that paragraph is upskilling. In the United States this is not considered a proper word.

On page 11, the initialism for propensity scoring has already been given on page 7.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
