Reviewer's report

Title: Number and timing of antenatal HIV testing: Evidence from a community-based study in Northern Vietnam

Version: 4 Date: 23 January 2011

Reviewer: Larissa Mackey

Reviewer's report:

This is an article of importance not only due to the important relevance of the topic but also due to the emphasis of highlighting needs for changes in strategies and policies in the study area. It also highlights challenges in these goals.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
