Minor Essential Revisions: None
Discretionary Revisions: None

The manuscript "GET WELL: an automated surveillance system for gaining new epidemiological knowledge" by Anette Hulth and Gustaf Rydevik is well written. I could not determine any problems with the Methods and Results section and Figures. The conclusions are sound and are a contribution to scientific knowledge. I have also read some of the references. I do not see a problem with citations. I recommend to publish the manuscript.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
