Reviewer's report

**Title:** An association between seeing incidents of alcohol or drug use in films and young Scottish adults’ own alcohol or drug use: cross sectional study

**Version:** 2  **Date:** 21 December 2010

**Reviewer:** amanda atkinson

**Reviewer's report:**

The edited manuscript provides evidence that the authors have sufficiently addressed the discretionary, minor and major revisions outlined in my initial review. The paper now reads well and is more consistent. The main finding of a decrease in the association between film images of substance use and young people’s own substance after adjustment for other factors is now much more clear in the manuscript.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** Yes, and I have assessed the statistics in my report.

**Declaration of competing interests:**
