Reviewer's report

Title: Clustering patterns of physical activity, sedentary and dietary behavior among European adolescents: The HELENA study

Version: 2 Date: 20 March 2011

Reviewer: Ssu-Yuan Chen

Reviewer's report:

The authors present an interesting work using cluster analyses of physical activity, sedentary and dietary patterns in the Healthy Lifestyle in Europe by Nutrition in Adolescence (HELENA) study. The current manuscript is well written. The work is clearly of interest to those working in the field and I would therefore like to suggest its acceptance.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
