The Editor,
BMC Public Health,

Dear Sir,

Re: Re-review of Delivery Practices and Associated factors among mothers seeking child welfare services in Nyandarua South District, Kenya

Thank you for the opportunity to review this manuscript again after the authors have attempted to address all the concerns raised earlier. I must say that the authors have largely corrected all the key issues that I raised and this has made the content of the manuscript clearer for an unbiased reading. The inclusion of the questionnaire has also added value to this scientific write-up. However, there are still some typographical errors which I think could easily be addressed administratively.

I therefore strongly believe that the manuscript is acceptable in the current format.

Thank you

Yours Sincerely,

Dr. Imran O. Morhason-Bello (Signd)

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
