Reviewer's report

Title: Delivery Practices and Associated Factors among Mothers seeking child welfare services in Selected health facilities in Nyandarua South District, Kenya

Version: 5 Date: 3 March 2011

Reviewer: Margaret Elizabeth Kruk

Reviewer's report:

The authors have improved this paper. Two other changes will increase clarity of the results:

1. Please clearly state the outcome variable for the regressions in Table 1 and Table 2. The wording "delivery practice" is ambiguous. Presumably these regressions use "delivery by unskilled attendant" as the outcome of interest with skilled delivery as reference?

2. Please delete the n's in Table 2 for each variable. These repeat data from Table 1 and are non-standard in presentations of regression results.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:

I have no competing interests.
