Reviewer's report

Title: Health care seeking behavior for diarrhea in children under 5 in rural Niger: results of a cross-sectional survey

Version: 2 Date: 1 April 2011

Reviewer: Christiane Horwood

Reviewer's report:

Minor discretionary revisions
In paragraph 2 of the background the section beginning 'severity signs...diarrhoea with severe dehydration is the only severe condition which does not automatically lead to referral. In the absence of other severity signs..' is a bit confusing and could be re-written to make it more clear.

Discretionary revisions
I still feel that the discussion could be improved to really highlight the main messages of the paper

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
