Reviewer's report

Title: Cost-effectiverness of novel vaccines for tuberculosis control: a decision analysis study

Version: 1 Date: 18 October 2010

Reviewer: Joris Menten

Reviewer's report:

As a statistician I can only review the statistical/methodological aspects of the paper.

This is a well written, thoroughly documented and well thought out paper. The paper adequately describes and references all inputs and assumptions in the decision analytical model. The sensitivity analyses seem appropriate and assesses possible biases. The discussion describes in depth limitations and assumptions underlying the analysis.

The paper merits publication as it is.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
