Reviewer's report

Title: Barriers to antiretroviral therapy adherence in rural Mozambique

Version: 1 Date: 8 June 2011

Reviewer: Chris Duncombe

Reviewer's report:

Minor Essential Revisions
I would like to see a better balance of responses from the community and from the health care workers. Right now, there is much about community and much less about HCW. an expanded compare and contrast discussion would be helpful

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
