Reviewer's report

Title: Successful implementation of a wellness and tobacco cessation curriculum in psychosocial rehabilitation clubhouses

Version: 2 Date: 2 August 2011

Reviewer: Abraham Brown

Reviewer's report:

I am still not convinced about the rationale for reporting both smokers and non-smokers. Why not report the findings for tobacco users only and state in the limitation that although the program curriculum included non-tobacco users, these were not reported because of inconsistency in delivering the curriculum.

In the abstract, the authors should state key findings in terms of proportions. For instance, it’s unclear what the phrase: ‘results showed positive perceptions of curriculum impact...’ mean?

Consider combining the following: (i) Tables 1 and 2, and (ii) Tables 4 and 5.

Provide the sample sizes for each Table, perhaps in the first row.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
