Reviewer's report

Title: Knowledge, perceptions and myths regarding infertility among adults visiting tertiary care hospitals in Pakistan

Version: 2 Date: 23 June 2011

Reviewer: Ruth Dixon-Mueller

Reviewer's report:

The revisions have substantially improved the paper, given the limitations of the study and the questionnaire. Nevertheless, it remains rather awkwardly written and presented, and some footnotes are still incomplete (e.g., journals articles are cited without page numbers). The paper needs to be edited professionally if it is to be submitted to a professional journal.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
