Reviewer's report

Title: What is the comparative health status and associated risk factors for the Metis? A population-based study in Manitoba, Canada

Version: 4 Date: 1 September 2011

Reviewer: Sandra Winter

Reviewer's report:

In the revised manuscript entitled "What is the comparative health status and associated risk factors for the Metis? A population-based study in Manitoba, Canada" the authors have satisfactorily responded to the comments I made in my review. I look forward to seeing this article published.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
