Reviewer's report

**Title:** Incidence and cost of anal, penile, vaginal and vulva cancer in Denmark

**Version:** 2 **Date:** 27 September 2012

**Reviewer:** Isabelle Borget

**Reviewer's report:**

dear editor,

thank you to let me the opportunity to make this review, and sorry for this late review.

Tha article is interesting, well written, based on individual data extracted from reimbursement and cancer registry data.

However, the authors only interested on some cancers related on HPV, and did not included head & neck cancers. however, the burden of this cancer was shown to be the highest in many countries. My opinion is that the quality and the relvance of the article will be increased if the authors add this kind of cancer in their article.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** Yes, and I have assessed the statistics in my report.

**Declaration of competing interests:**
