Reviewer's report

**Title:** Awareness makes a difference: Emergency contraception usage; a cross-sectional study among Ethiopian undergraduate female students.

**Version:** 3  **Date:** 18 December 2011

**Reviewer:** Yehualashet Tadesse

**Reviewer's report:**

Major: I feel the topic is not appropriate. Did the study demonstrated any difference in EC use which is associated with a difference in awareness? Of course, I have seen comparisons with previous studies done on less educated people. Can we dare to say awareness makes a difference based on this comparison?

Minor: The websites that were reffered need access date.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests.
