Reviewer's report

Title: Tribal Casinos in California: The Last Vestige of Indoor Smoking

Version: 2 Date: 13 January 2012

Reviewer: Xisca Sureda Llull

Reviewer's report:

In my opinion, the authors has done the appropriate changes recommended by the editor and reviewers improving the manuscripts since the last submission. I have only some comments:

Abstract:
1. Background: Include the objectives of the study.
2. Results: maybe you could include some statistical results. Anyway, I missed results about the exposure to SHS.

Methods:
1. Ordinal measure to account for the amount of time spent around SHS during the last visit (no time at all-all of time) # I don’t understand how you quantify the level of exposure.

Results:
1. I suggest to change the first sentence and start directly as follows: “The prevalence of current smoking was…”.

Tables and figures:
1. Table 1 and table 2. There is no concordance in the number of non-patrons N=7,036 in table 1 and N=7,015 in table 2.

Limitations:
1. I don’t think that the use of a cross-sectional design is a limitations of the study. I suggest to remove it.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
I declare I have no competing interests
