Reviewer's report

Title: Estimating the probabilities of making a smoking quit attempt in Italy: stall in smoking cessation levels, 1986-2009

Version: 1 Date: 10 January 2012

Reviewer: David Levy

Reviewer's report:

This paper is much clearer and more understandable. The paper needs a good editing for proper English, and it would be useful to have more explanation about how the Italy's smoking rates (current and someday smokers) compares with the Netherlands smoking rates, so that the reader can evaluate this crucial assumption.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
