Reviewer's report

Title: Multimorbidity prevalence and patterns across socioeconomic determinants: a cross-sectional survey

Version: 2 Date: 8 January 2012

Reviewer: Stewart Mercer

Reviewer's report:

I'm happy for the paper to be accepted now if the authors include the paper by Mercer and Watt 2007 in Annals of Family Medicine as suggested in my last review. The authors do not make a coherent arguments as to why it should be omitted, and given that it reports on multimorbidity and socio-economic status, it would be wrong in my view not to include it.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
