Reviewer’s report

Title: Diabetes mellitus type 2 in urban Ghana: characteristics and associated factors

Version: 2 Date: 2 November 2011

Reviewer: Sargoor Veena

Reviewer’s report:

This unmatched case-control hospital based study investigates the clinical, anthropometric, socio-economic, nutritional and behavioural characteristics among urban Ghanian adult population with or without diabetes and hypertension and the factors associated with these outcomes.

The paper is much improved now. Authors have answered sufficiently to all the points with regard to my comments
