Reviewer’s report

Title: Association between physical activities and school records in Korean adolescent students

Version: 3 Date: 1 December 2011

Reviewer: Marsha Dowda

Reviewer’s report:

The author did a good job of addressing some of the concerns of the reviewers. This includes the reanalyses to incorporate the sampling design.

Major

But, the manuscript still uses the term- student records. Although the author attempted to report to the reviewers what the term did not include, such as behavioral conduct. But nothing was added to the manuscript. What is meant by school records needs to be mentioned in the manuscript itself.

Minor

Page 3- Is overweightness a word?

Page 4, line 5, there needs to be an s added to the word behavior.

Page 5, rather than family’s economic status, it may be more informative to say family income status.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
