Reviewer's report

**Title:** Comparing risk factors of HIV among Hijra Sex Workers in Larkana and other cities of Pakistan: An analytical cross sectional study

**Version:** 2  **Date:** 25 January 2012

**Reviewer:** John Scott

**Reviewer's report:**

I think the authors have done well to address a number of issues raised by myself and the other reviewer. While I would have still appreciated some more context on services in the region, especially given the conclusions, I am conscious of word limitations and feel that efforts to address my concerns have been adequate. As such, I think this paper should be published. This noted, the newly introduced paragraphs need to be edited to tighten up some of the wording/phrasing.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests
