Reviewer’s report

Title: Objective assessment of dental fluorosis in an epidemiological setting

Version: 4 Date: 22 March 2012

Reviewer: Monique van der Veen

Reviewer’s report:

all issues raised have been answered

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I am an inventor on several patents and patent applications related to
quantitative light induced fluorescence. My current research on fluorescence of
caries, plaque and calculus at the Academic Centre for Dentistry Amsterdam, the
Netherlands is funded by the Dutch technology fund STW and Inspektor Research
Systems BV. Inspektor Research Systems BV sells QLF camera’s (not the one
described in this paper) and software and owns the licenses of QLF related
patents.
