Reviewer's report

Title: Factors associated with prenatal folic acid and iron supplementation among 21,889 pregnant women in Northern Tanzania: a cross-sectional hospital-based study.

Version: 2 Date: 20 April 2012

Reviewer: David Taylor-Robinson

Reviewer's report:

Dear Dr Pope

Thank you for the opportunity to review this manuscript. The authors seem to have addressed all of the issues that I raised in my first review.

On re-reading I have noticed one further issue. The authors use the term multivariate to describe their final model. Multivariate regression suggests a single regression model with more than one outcome variable, as opposed to multivariable or multiple regression (multiple independent variables). Could the authors clarify which is the case (minor essential revision).

Best wishes

David Taylor-Robinson
