Reviewer's report

**Title:** Tuberculosis lymphadenitis in Southwest Ethiopia: a community based cross-sectional study

**Version:** 2  **Date:** 25 May 2012

**Reviewer:** Solomon A Yimer

**Reviewer's report:**

The authors have very well addressed my queries and comments.

**Minor essential revisions**

1. Table 3 – please close the bracket for the proportion of the group “no (negatives)” corresponding to the variable “contact with cattle”.
2. Table 4- Please correct the decimal place for the proportion of the group “>12 weeks” duration.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** Yes, and I have assessed the statistics in my report.
