Reviewer's report

Title: The Cedar Project: High incidence of HCV infections in a longitudinal study of young Aboriginal people who use drugs in two Canadian cities

Version: 5 Date: 21 June 2012

Reviewer: Paul Nelson

Reviewer's report:

Dear Editor,

The authors have thoughtfully addressed each of the suggestions made in the previous review.

Major Compulsory Revisions: none.

Minor Essential Revisions: The previous two reviews requested descriptive statistics for all variables in Table 2. Such information is useful to the reader and necessary to evaluate the statistical analyses. The authors have added some useful demographic statistics in text and wish to maintain a focus on the longitudinal data. The remaining statistics can be provided in a supplementary table.

Discretionary Revisions: see previous review.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
