Title: Improving adherence to ante-retroviral treatment for people with harmful alcohol use in Kariobangi, Kenya: a PRA approach

Version: 1 Date: 26 February 2012

Reviewer: Shelley Lees

Reviewer’s report:

Compulsory Revisions

I would make this a more descriptive, qualitative paper with more analysis, no statistical analysis and less repetition.

I suggest that you address all the questions/points above

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
