Review:
This study reports the epidemiology of all hospitalized acute poisonings in Oslo during one-year, including mortality, intention, and follow-up referrals. The
authors have answered all my remarks satisfactorily and made adequate corrections in the manuscript.

This study is now suggested for publication.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**
